

Middle East Region Staff College 2009

INTERNET

Billeting rooms have an ethernet plug for each occupant. Access is outgoing through McDaniel's network. Because of this, personal email may only be checked if you have access to web mail. In other words, you will not be able to check email through a mail client such as Outlook or Eudora.

Prior to your arrival at McDaniel, access accounts will be set up for each student. Instructions on how to access the internet through McDaniel's network will be part of the in-processing packet. Although McDaniel has wireless access points, they also run through their secured network and may not be accessible to us. Students are urged to use laptops or computers with hard-wire access and will need to bring their own ethernet cable.

An email account for each work group will be set up and used for all College work. At no time should students send other students or staff any email from or to a personal email address. Staff will not answer any mail from a personal address. MERSC email is web-based and is provided specifically for this year's College. As such, do not give the email address to anyone outside the College. Use of MERSC email for personal reasons is strictly prohibited. All College email addresses will be disabled on the last day of the school, Saturday, June 13.
